# Healthy Washington - Roadmap to Recovery

## County Approach

On March 11, 2021, Governor Inslee announced the Healthy Washington - Roadmap to Recovery plan will be transitioning from a regional approach to a county-by-county evaluation process. Below are the county phases as of April 16, 2021.

## Metrics

Counties will be individually evaluated every three weeks. The evaluations will occur on Mondays with any possible changes taking effect Friday. The next evaluation will be May 3rd. DOH will update metrics [here](#).

In addition to being individually evaluated, large and small counties will have different sets of criteria. In order to move down one phase a county must fail both metrics for case counts and hospitalizations. Under the previous plan, a county only needed to fail one metric to move back one phase.

For large counties, defined as counties with more than 50,000 residents, to remain in Phase 3 they must keep a 14-day average of new COVID cases below 200 per 100,000 residents, and a seven-day average of new hospitalizations per 100,000 below five.

Smaller counties, those with populations of 50,000 or less, must maintain a 14-day average of new cases below 100, and a new seven-day hospitalization average below three.

County Size	Indicator	Phase 1	Phase 2	Phase 3
Larger County	New COVID cases per 100,000 population over 14 days	> 350	200 - 350	< 200
	New COVID hospitalizations per 100,000 population per 7 days	> 10	5 - 10	< 5
Smaller County (< 50k people)	New COVID cases over 14 days	> 175	100 - 175	< 100
	New COVID hospitalizations over 7 days	> 5	3 - 5	< 3

If at any point the statewide ICU capacity reaches greater than 90%, all counties will move down one Phase. The Department of Health always maintains the ability to move a county forward or backward at their discretion.
